Customer issues

1) How to **optimize the cost and time** of an Analytics project?

2) How to deliver advanced reports on S/4HANA Public Cloud ?

3) How to satisfy my functional teams by **quickly offering them strategic reports**?

4) How to have a **consistency of the semantic layers** in the different Analytics tools of my organization?

Customer use cases

START A NEW PROJECT ON SAP DATASPHERE

exertis

BUSINESS CONTEXT

Exertis evaluated Pro & Con's to start **either on SAP Datasphere Project or rebuild everything in Snowflake.**

ROI

- Start a SAP Datasphere Project with little effort thanks to the well structured RapidViews Business Content organised in datamarts
- Delivery of their Analytics foundation within approx. 2 months
- This SAP Datasphere Project is a smooth transition and compatible with S/4HANA

RAPIDVIEWS DEPLOYED

RAPIDVIEWS SD · RAPIDVIEWS MM · RAPIDVIEWS FI-CO

HOW TO DELIVER ADVANCED REPORTS ON S/4HANA PUBLIC CLOUD ?

Soucy

BUSINESS CONTEXT

Canadian customer on **S/4HANA Public Cloud**, unable to address complex personalised reporting with Embedded Analytics because there is no direct access to tables.

S/4HANA Public Cloud   +   SAP Datasphere   +   RapidViews Business Content

ROI

- RapidViews implemented on SAP Datasphere connected to CDS Views from S/4HANA to use RapidViews Business Content and instantly use Standard Reports in SAP Analytics Cloud
- Delivery of their first reporting within approx. 2 months.
